Our Inspiration

History is full of instances, wherein, victory would have been to the vanquished, if only they had battled a little longer! We often fail for lack of perseverance in our efforts. We leave our work half done in our impatience. Every job demands its quota of efforts. Never give up too soon.

Assessment

Evaluation and assessment are of vital importance in estimating the overall progress of students. The future of a student is determined by their performance in examinations. At CVV, all efforts are taken to ensure that the assessment system adopted is fair, efficient, reliable, transparent and strictly follows the examination rules and regulations formulated by the University. The grading policy as specified by UGC in the CBCS scheme is being followed to maintain uniformity across institutions. This is based on a 10-point grading system with letter grading in compliance with UGC norms. The students' final performance is indicated by a single composite measure viz. the Cumulative Grade Point Average (CGPA).

The evaluation of students in each course of a programme is designed as per the course outcome and is based on Continuous Internal Assessment (CIA) carried out during the semester and University Examinations (UE) conducted at the end of the semester. The ratio of weightage is 30% CIA and 70% UE for undergraduate programmes and 50% for both CIA and UE for postgraduate programmes.

Faculty at CVV ensure that the students are aware of the evaluation criteria in CIA and UE. It is explained to them in detail to enhance the transparency and rigour to focus on individual and original work. The framework of CIA consists of multiple components such as assignments, tests, quizzes etc. and provides effective mid-course corrections. It is mandatory for students to appear for the UE in all registered theory and practical courses for completion of the requirements of the programme.

The eligibility criteria for appearing for the UE are 75% attendance and 40% in CIA for all courses under UG and 75% attendance and 50% in CIA for all courses under PG programmes offered by CVV. For getting a passing grade of 'P' for UG or 'B' for PG, a student shall secure a minimum of 40% mark from both CIA and UE evaluation components in each course of UG programmes and a minimum of 50% mark from both CIA and UE evaluation components in each course of PG programmes.

The results of examinations are usually announced on the University website within ten working days from the date of the last examination. The performance of a student is represented by the Semester Grade Point Average (SGPA) and Cumulative Grade Point Average (CGPA) which are calculated by the standard methods.

CVV has in place a robust system to address the various examination related grievances of students. Programme specific details of the evaluation pattern can be found in the curriculum document of the respective programmes.
